

## Advertising Barrier Gate AK-D208

### Parameters:

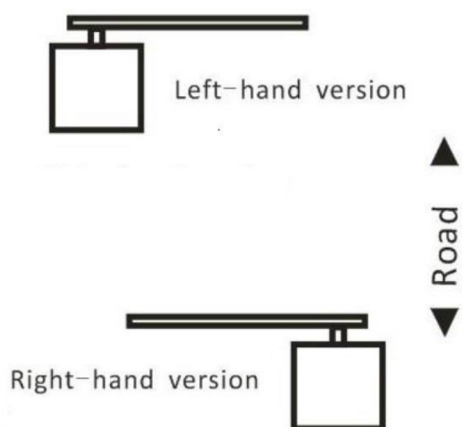

Power supply	220V±10%/50HZ,60HZ
Motor power	AC220V,160W
Temperature	-30~80℃
LED strip power supply	DC12V
Advertising Plate Dimension	82*830mm
Advertising screen Dimension	440*920mm
Remote Control Distance	≤30m
Opening and closing times	3s~6s
Boom Length	Max 9m
Housing dimension	450*331*1180mm

### Features:

- Direction and speed are adjustable.
- Advertising barrier's house is durable and water-proof, so it can be used outdoor.
- Adopt Photosensitive sensor control to control LED light, more intelligent.
- Adopt multiple protective measures (like anti-wind, preventing motor overheat, Anti-surge, Thunder-proof and so on), which increase barrier's safety and reliability.
- Multiplex control way is provided for user: push button, remote controller, long range reader etc.
- Add loop sensor, following functions can be realized: auto close, auto bounce up etc. It can automatically close gate and perfect preventing smashing car.
- Opening first function, it can highly increase access rate.
- System adopts standard electric interface which can connect with other system easily.

### Barrier Direction:

### Machine core structure:
